## Supporter scheme policy statement

**Cornwall Wildlife Trust exists to protect Cornwall's wildlife and wild places. It promotes its ethos to its members and beyond, with the aim to inspire one and all about nature.**

We hope that the policy statement on this page will help companies, Cornwall Wildlife Trust's individual and family members, and the public at large to understand the positive way in which Cornwall Good Seafood Guide relates to the business sector.

The Trust firmly believes that its conservation objectives can best be achieved if all sectors of the community, including relevant businesses, professions, trades, commerce and industry, work together for common aims. Cornwall Good Seafood Guide (CGSG) enjoys the support of many businesses, large and small, from various sectors. These businesses are known as 'CGSG Supporters', who all recognise that supporting the Cornwall Good Seafood Guide makes business sense, and that helping towards healthy seas and supporting local fisheries is important to Cornwall as well as their business.

It is important for Cornwall Wildlife Trust to clearly set out the basis upon which it may either invite or accept organisations to become a CGSG Supporters. The focus of the CGSG Supporter scheme is firmly on individual business responsibility.

### **The Trust believes that the following criteria are relevant with respect to developing individual CGSG Supporter relationships:**

- CGSG welcomes Supporters who share the same values as Cornwall Wildlife Trust, and recognise the need to have a healthy environment with a full range of wildlife, not only for its own sake, but to ensure that the world is a fit and safe place to pass on to the next generation.
- CGSG welcomes Supporters who have themselves considered their impact on the natural environment and have set these beliefs out clearly. Many businesses may have already formulated an environmental strategy for their company, but this is not a pre-requisite.

### **Conditions of membership:**

- CGSG welcomes Supporters who endeavour to supply their customers with fresh Cornish seafood that is recommended by Cornwall Good Seafood Guide. If two or less types of seafood are available on the product list/menu then every effort must be made to ensure they are recommended species. If three or more types of seafood are sold there should be a minimum of two recommended species available.
- CGSG Supporters must abide by the 'Guidelines for use of the CGSG logos' overleaf, which have been designed to achieve a mutually beneficial agenda. The CGSG logo is a registered trademark.
- CGSG will not accept organisations or industries whose principles, policies or conduct are in obvious conflict with Cornwall Wildlife Trust's values, or where an association might undermine the Trust's reputation or credibility and/or damage its relationship with a significant number of its supporters.
- CGSG reserves the right to refuse the support of, or association with, any specific company or organisation and may cancel an established association if it becomes apparent that there are conflicts of interest with its objectives. In such a case, CGSG reserves the right to end the support of a Supporter by refunding a proportion of the support paid for the current year.
- An association with CGSG through its Supporter scheme does not imply in any way the endorsement of any idea, service, activity, position or product of the Supporter itself. It does however endorse the sale of specific seafood species and capture methods, in-line with the current CGSG recommended list.
